D-Link Green Ethernet for Schools

Switch to green and save 44% on your energy consumption

Now there's a new way of paying less for energy and replacement hardware, and shrinking carbon footprints at the same time.

D-Link's Green Ethernet for Schools gives a choice of high performance network switches that use up to 44% less energy and provide a much lower total cost of ownership. D-Link's intelligent switches are greener because they ration power, produce less heat and last longer. www.dlinkgreen.co.uk

D-Link X-Stack managed switch offer

This programme allows your customer to recover some value from their old network switches with the minimum of effort. So by trading in old equipment for the latest products from D-Link's award-winning xStack range, your customers will get a brand new kit and save cash in the process!
